

ISO/IEC 27001

Mini Compliance Assessment Project

Organization:
Nova Cloud Analytics Pvt. Lmt.

This assessment represents the organization's initial evaluation of establishing an Information Security Management System (ISMS) and emphasizes the steps required to achieve improved security maturity and readiness for ISO 27001 compliance.

Overview:

This simulated ISMS assessment, aligned with ISO 27001 requirements, has been conducted for Nova Cloud Analytics, a cloud-based SaaS startup.

The control assessment was performed by selecting Annex A controls to evaluate the organization's current security status and understand where it needs improvement.

Asset Inventory:

The asset inventory for this assessment contains critical assets such as

- source code repositories,
- employee collaboration platforms,
- cloud infrastructure,
- employee workstations
- organizational data.

Compliance Assessment Observation

The evaluation showed that several controls have already been implemented such as access control, cloud security configurations, data backup mechanisms and so on, while some are partially implemented.

Gaps were identified in especially governance and monitoring areas.

Key improvement areas include

- developing a formal information security policy,
- implementing security awareness training,
- integrating MFA,
- establishing incident response plan and
- improving monitoring capabilities.

The graphic consists of two overlapping circles. The left circle is a light purple color, and the right circle is a light blue color. The text 'Thank You' is written in a bold, dark blue, sans-serif font. The word 'Thank' is positioned on the top line, and the word 'You' is positioned on the bottom line, directly below 'Thank'. The text is centered between the two circles.

**Thank
You**
